**AMI**  
ARC MACHINES, INC.

Tungsten is an integral part of your orbital welding process. With CSI you receive only the highest quality of pre-ground tungsten. The accuracy, repeatability and reliability of the electrode input to the weld process are guaranteed when using high quality, pre-ground, polished tungsten electrodes. We offer competitive prices and immediate delivery.

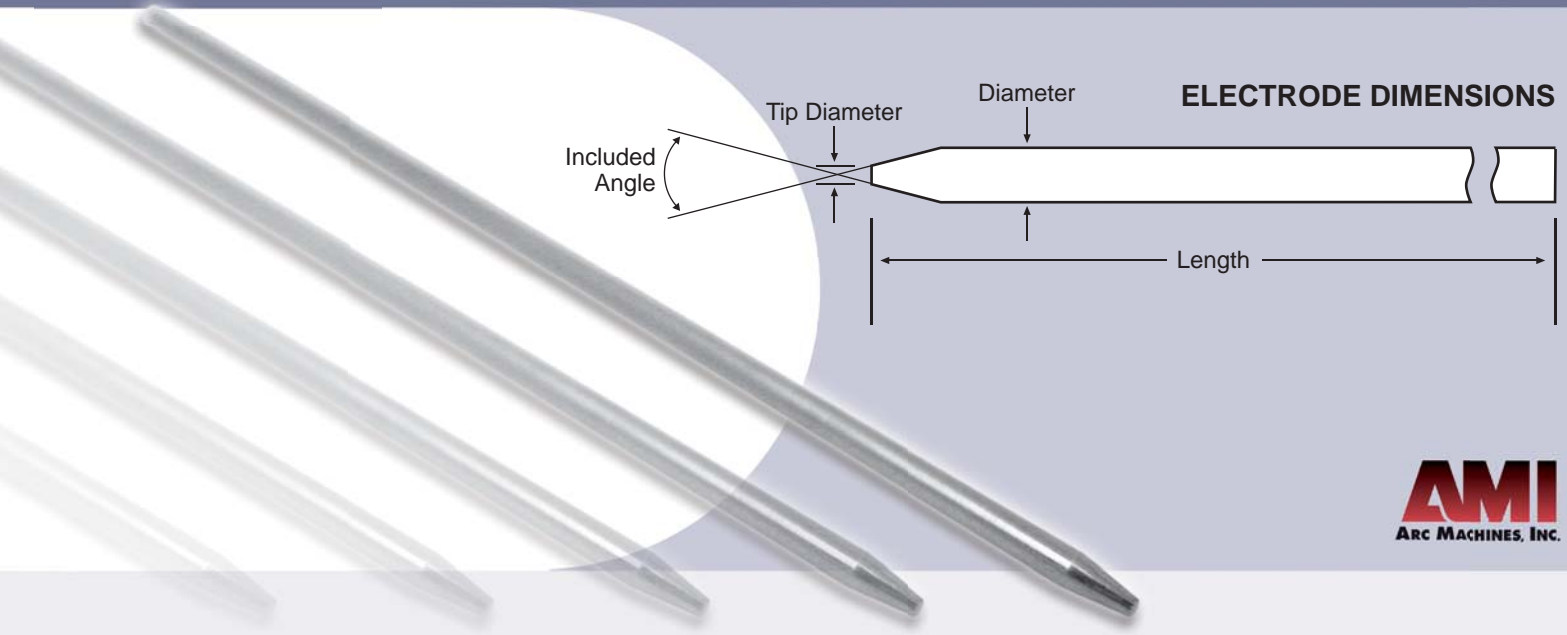

- Competitive pricing
- Improved arc starting and stability
- Lower risk of tungsten shedding/inclusions
- Improved weld quality and appearance
- Minimizes electrode contamination issues
- Longer electrode life and increased production
- Consistent weld penetration
- Reduced scrap and rework
