

April 7, 2025

Importance: High

Dear Valued Partner:

At Pentair Food & Beverage Solutions, we continually review our cost structure to ensure that we are providing the highest quality products and services in the industry, at competitive market prices. Likewise, we are dedicated to developing partners who are committed to promoting Pentair benefits and technology to end users across multiple industries.

As you may be aware, recent changes in international trade policies have resulted in reciprocal import tariffs based on country of origin. This development has significantly impacted the costs associated with importing materials into the United States. To mitigate these expenses, it has become necessary to make adjustments to our pricing structure.

Effective April 9th, 2025, Pentair Food and Beverage North America will apply the following list price adjustments to all open orders and quotations based on product lines and countries of origin:

- 14% list price increase for Sudmo components sourced from the European Union
- 15% list price increase for Haffmans components sourced from the European Union
- 15% list price increase for Standard Skid Mounted Solutions, Components+ and BMF Equipment and Components sourced from the European Union
- 8% list price increase for Sudmo components sourced from New Zealand

You can rely on Pentair Food & Beverage Solutions to supply the highest quality products and provide the best customer service and support in the industry. We appreciate your business and your support of Pentair products over the past years, and we look forward to continued success in the future.

We will continue to monitor and adjust our pricing as trade policies change.

Please distribute this notice to all others in your organization who need to be aware of this information.

Please contact your Regional Sales Manager with any questions.

Sincerely,

Christoph Chantraine
General Manager
Pentair Food and Beverage Solutions
