

Important Update – Postponement of Pricing Adjustments

Given the unprecedented volatility in tariffs over the last few weeks, SPX FLOW has decided to postpone the scheduled price increase implementation until **April 21, 2025** across the US list prices for APV, Seital, Gerstenberg Schröder (GS), and Waukesha Cherry-Burrell (WCB) equipment and spares products. This delay is intended to provide stability as we assess the evolving trade environment and analyze the cost impact.

Since our initial price adjustment announcement last month, additional tariffs have been implemented globally with the possibility of further increases in the near future. As of this time, these include:

- 145% reciprocal tariff on goods imported into the US from China
- 25% tariff on steel and aluminum goods imported into the US from all countries
- 10% reciprocal tariff on imports into the US from most countries around the world
- In addition, there are inflationary pressures from US suppliers due to their cost increases from tariffs

To account for the expected dramatic rise in costs, the actual list price adjustment will likely exceed the originally announced range. Pricing on existing quotes will be honored for the specified validity period.*

We will continue to monitor the situation closely and make further adjustments as necessary to adapt to any ongoing changes in trade policies.

We appreciate your understanding and partnership during these uncertain times. If you have any questions, please don't hesitate to reach out to your local salesperson or customer service representative.

**Due to the nature and supply chain of the APV Plate Heat Exchangers, the pricing and quote validity terms may vary. More information will be sent out separately.*
