

Air-Blow Check Valve Accessories

Keep your check valve
operating at optimum
performance.

Features

- Extremely long filter cartridge life
- Low pressure drop
- Serves flow ranges from a few standard cubic feet to 40,000
- Complete sizes range from 1/4" to 10" ports
- Shipped complete, ready to install with filter cartridge, automatic drain, and differential pressure indicator

Applications

- Remove, protect, and increase the efficiency of desiccant and refrigerant air dryers
- Mainline filters remove oil and water at the source
- Smaller point-of-use filters protect sensitive instruments and pneumatic machinery from water, oil and particle contaminants

Airblow Check Valve Accessories
