

# Alfa Laval LKB and LKB-F

## Butterfly valves

### Introduction

The Alfa Laval LKB Butterfly Valve is a reliable, hygienic in-line valve for routing low and medium-viscosity liquids in stainless steel pipe systems due to its substantial opening area and low flow resistance. The LKB is available with a standard handle with spring-locking action for straightforward manual operation or with a pneumatic actuator for pneumatic operation.

### Application

This hygienic valve is designed for on-off duties with low to medium-viscosity liquids in hygienic applications across the dairy, food, beverage, brewery and many other industries.

### Benefits

- Versatile, highly modular, hygienic design
- Reliable, cost-effective performance
- Easy to configure in either a manual version or a pneumatic version

### Standard design

The LKB Butterfly Valve consists of two valve body halves, valve disc, and bushings for the disc stem and a seal ring. These components are assembled by means of screws and nuts. The valve comes with standard weld ends but can also be supplied with fittings. The valve can also be fitted with the Alfa Laval ThinkTop® V50 and V70 for sensing and control of the valve.

The valve is available in these dimension standards: the LKB for ISO and the LKB-2 for DIN tubes. The LKB is also available in a flange version, the LKB-F, with two flanges and two flange seal rings for easy removal of the valve body without dismantling further piping setups.

The actuator is available in two versions, the LKLA and the LKLA-T (T for mounting of an indication or control unit on the actuator) and in two sizes,  $\varnothing$  3.35" and  $\varnothing$  5.24", to cover all valve requirements. The actuator is fitted onto the valve using a bracket and screws. A handle for manual operation is fitted onto the valve by means of a cap/block system and a screw.

### Working principle

The Alfa Laval LKB Butterfly Valve can be operated either by means of a pneumatic actuator from a remote location or

manually operated by means of a handle. The actuator comes in three standard versions: normally closed (NC); normally open (NO); and, air/air activated (A/A).

For pneumatic operation, an actuator converts axial piston motion into a 90° rotation of the shaft. The actuator torque increases as the valve disc comes into contact with the seal ring of the butterfly valve to secure proper closing of the valve seat.

For manual operation, a handle mechanically locks the valve in open or closed position. Two-position, four-position, regulating 90°-position, and multi-position handles are available. Manual valves can also be mounted with indication units for feedback on the valve position (open/closed).

## Technical Data

### Valve

Max. product pressure:	145 PSI
Min. product pressure:	Full vacuum
Temperature range:	14 °F to 284 °F (EPDM) However max. 203°F when operating the valve (All seals)

### Actuator

Max. air pressure:	87 PSI
Min. air pressure, NC and NO:	60 PSI
Temperature range:	15 °F to 195 °F
Air consumption (litres free air) - ø3.35 in:	0.24 x p (bar)
Air consumption (litres free air) - ø5.24 in:	0.95 x p (bar)
Weight:	- ø3.35 in: 6.6 lbs - ø5.24 in: 26.4 lbs

### ATEX

Classification:	II 2 G D <sup>1</sup>
-----------------	-----------------------

<sup>1</sup> This equipment is outside the scope of the directive 2014/34/EU and must not carry a separate CE marking according to the directive as the equipment has no own ignition source

## Physical Data

### Valve bodies

Product wetted steel parts:	1.4307 (304L) or 1.4404 (316L)
Disc:	1.4301 (304) or 1.4404 (316L)
Other steel parts:	1.4301 (304)
Rubber grades:	Q, EPDM, FPM, HNBR <sup>1</sup> or PFA <sup>1</sup>
Bushes for valve disc:	PVDF
Finish:	Semi-bright
Inside surface finish:	≤ Ra 32µin

<sup>1</sup> LKB-F (DIN) with HNBR and LKB-F (DIN & ISO) with PFA are supplied with EPDM flange seal.

### Actuator

Actuator body:	1.4307 (304L)
Piston:	Light alloy (for ø3.35 in: Bronze) Air/air version
Seals:	NBR

## Options

- Tri-Clamp® or butt weld ends standard - other connections available upon request
- ThinkTop® for control and indication<sup>1</sup>
- Green Top - position indication MS or PS
- Indication unit with micro switches<sup>1</sup>
- Indication unit with inductive proximity switches<sup>1</sup>
- Handle with two or four positions (standard on 6")
- Handle for electrical position indication
- Handle with infinite intermediate positions (not for 6")
- Multi-positioning handle with lever handle or pull knob
- Service tool for actuator
- Service tool for fitting 1"-1.5" valve discs

**Note!** For further details, see also ESE02446.

<sup>1</sup> For further information see Product Catalogue chapter "Control & Indication"
