The device that transformed the tank cleaning industry

Alfa Laval GJ 8

Application

Designed with ergonomics in mind, the Alfa Laval GJ 8 provides the same high impact clean as traditional, larger tank cleaners but is lighter, shorter, and narrower. This device is part of the world-renowned Gamajet range of high impact tank cleaning devices, and is the perfect alternative to heavy impingement cleaners, time-intensive spray balls, and costly manual tank cleaning. Compact and efficient, the Alfa Laval GJ 8 allows for space saving while maintaining the impact, durability, and range required for optimal impingement tank cleaning. This device is fluid-driven, eliminating the need for power assistance and is ideal for cleaning stubborn residues in large tanks in a variety of industries such as ethanol, paper, pulp, chemical, steel, industrial fermentation and many more applications requiring high impact cleaning.

Working principle

The Gamajet range of high impact tank cleaning devices combine pressure and flow to create high impact cleaning jets. Cleaning occurs at the point at which the concentrated stream impacts the surface. It is this impact and the tangential force that radiates from that point which blasts contaminants from the surface, scouring the tank interior. In conjunction with this impact, the device is engineered to rotate in a precise, repeatable and reliable, 360° pattern. This full-coverage, global indexing pattern ensures the entire tank interior is cleaned, every time.

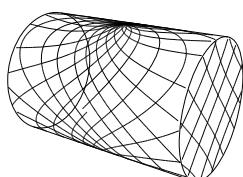

TECHNICAL DATA

Lubricant Food grade
Max. throw length 14 - 26 m (45-85 ft.)

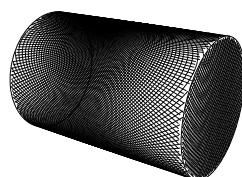

Pressure

Working pressure 3 - 28+ bar (40 - 400+ PSI)
Recommended pressure 4 - 20 bar (50 - 300 PSI)

Cleaning Pattern

First Cycle

Full Pattern

The above drawings show the cleaning pattern achieved on a cylindrical horizontal vessel. The difference between the first cycle and the full pattern represents the number of additional cycles available to increase the density of the cleaning.

Certificate

2.1 material certificate

PHYSICAL DATA

Materials

1.4404 (316L), PPS, PTFE, FKM (EPDM and FFKM available).

Temperature

Max. working temperature 95°C (203°F)
Max. ambient temperature 140°C (284°F)

Weight 6.5 kg (14.5 lbs.)

Connections

Standard thread 1½" Rp (BSP) or NPT, female
Available option 2" Rp (BSP) or NPT, female

Options

Electronic rotation sensor to verify 3D coverage.

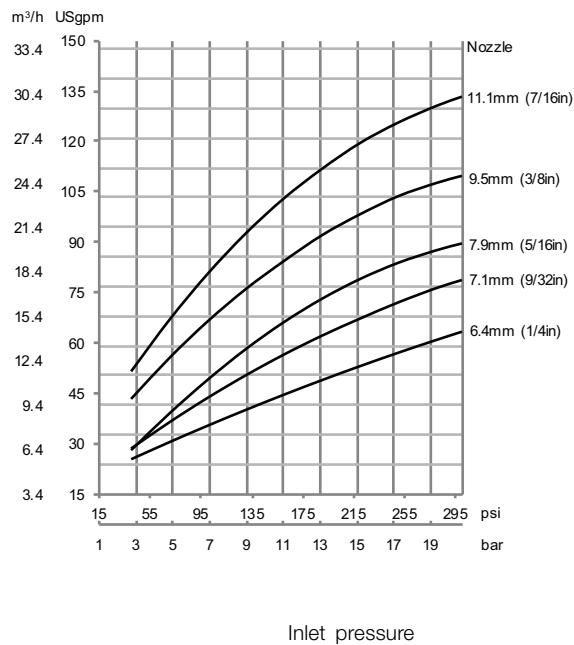

Caution

Do not use for gas evacuation or air dispersion.

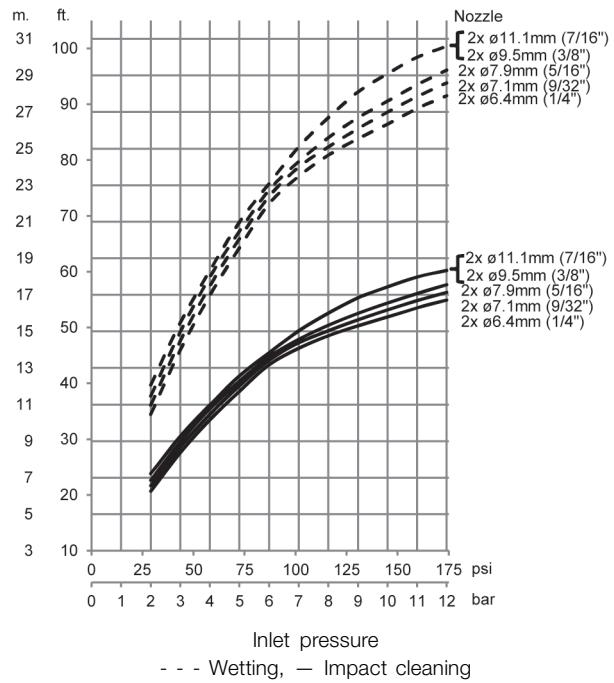

Disclaimer: Information in this product data leaflet is intended for general guidance purposes. Specific data for device selection and sizing is available upon request.

Dimensions

Dimensions

	A	B	C	D	E	F	G	H	I
mm	281	202	215	51	118	216	248	121	165
in	11.05	7.95	8.46	2.02	4.64	8.50	9.76	4.76	6.50

Dimensions 180° directional version

	A	B	C	D	E	F	G
mm	281	217	126	51	211	350	248
in	11.05	7.95	8.46	2.02	4.64	8.50	9.76

Standard Design

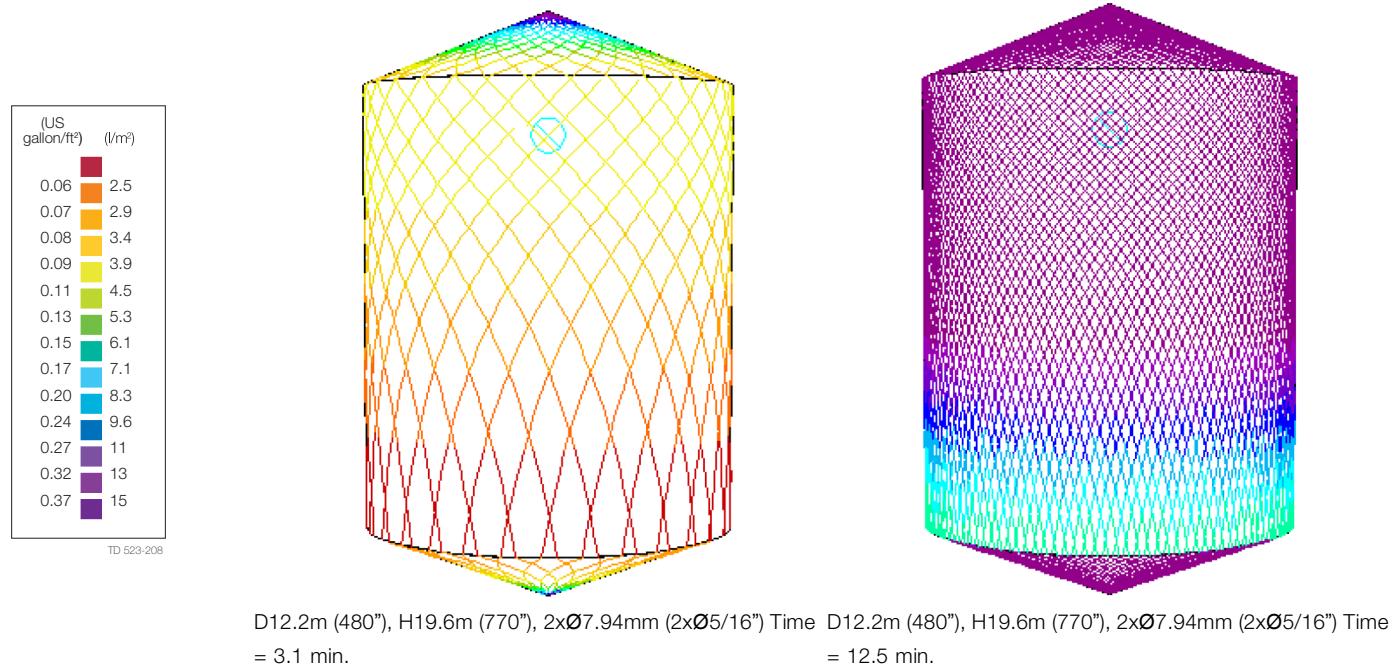

The choice of nozzle diameters can optimize jet impact length and flow rate at the desired pressure. As standard documentation, the Alfa Laval GJ 8 can be supplied with a "Declaration of Conformity" for material specifications.

TRAX simulation tool

TRAX is a unique software that simulates how the Alfa Laval GJ 8 performs in a specific tank or vessel. The simulation gives information on wetting intensity, pattern mesh width and cleaning jet velocity. This information is used to determine the best location of the tank cleaning device and the correct combination of flow, time, and pressure to implement.

A TRAX demo containing different cleaning simulations covering a variety of applications can be used as a reference and documentation for tank cleaning applications. The TRAX demo is free and available upon request.
