

# Alfa Laval LKC UltraPure

# Control/Check valves

#### Introduction

The Alfa Laval LKC UltraPure Non-return Valve is a hygienic one-way check valve for use in various processes throughout the high-purity industry to prevent reverse flow. It is easy to install, ensuring safety and high product quality.

#### **Application**

The LKC UltraPure Non-return Valve is designed for single directional product flow, meeting the demands of high-purity applications across the biotechnology, pharmaceutical and personal care industries.

#### **Benefits**

- Highly reliable, self-acting valve
- Easy to install
- Protects process equipment
- Prevents reverse flow
- Full transparency and traceability of the entire supply chain due to the Alfa Laval Q-doc documentation package

#### Standard design

The Alfa Laval LKC UltraPure Non-return Valve consists of a valve body in two parts, valve plug and spring, assembled by means of a clamp ring and hygienically sealed with a special seal ring. A guide disc with four legs ensure alignment of the spring-loaded valve plug with an o-ring seal. The valve is available with weld and clamp ends for ISO and DIN tubing connections.

# Working principle

The Alfa Laval LKC UltraPure Non-return Valve opens and closes depending on the pressure. The spring acts on the valve plug and keeps the valve closed until the force from the pressure in the inlet exceeds the force of the spring. If a reverse flow should occur, the spring force and the pressure from the outlet will keep the valve closed. Required differential pressure for opening the valve when fitted in a vertical pipe is approximately 0.87 PSI (0.06 bar).

# Certificates

#### **TECHNICAL DATA**

Max. product pressure: 145 PSI (10 bar)

Required differential pressure for opening the valve when fitted in a vertical pipe, is approx. 0.87 PSI (0.06 bar).

Internal:	Ra < 32 µin	
ASME BPE designation:	SF3	
External:	Ra < 32 μin	
Internal:	Ra < 20 μin	
ASME BPE designation:	SF1	
External:	Ra < 32 μin	

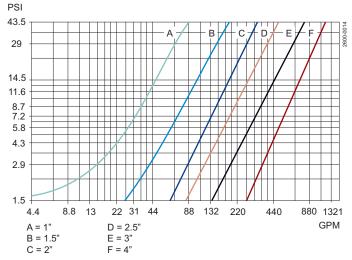

Classification: II  $2 G D^1$ 

# PHYSICAL DATA

TITIOIOAL DATA							
Product wetted steel part:	1.4404 (316L)						
Froduct wetted steel part.	Acc. to EN 10088 or equal (AISI 316L)						
Other steel parts	1.4301 (304)						
Other steel parts:	Acc. to AISI 304						
Spring:	Electropolished						
Elastomers							
	EPDM						
Product wetted elastomer:	Acc. to FDA and USP Class VI						
	Temperature: 14°F - 284°F						
	FPM						
Product wetted elastomer:	Acc. to FDA						
	Temperature: 14°F - 356°F						
Connections							
NA	Matching tubes and fittings: ISO 2037 / Series A/DIN						
Weld ends:	Acc. to ISO or DIN						
Oleman ander	Matching tubes and fittings: ISO 2037 / Series A/DIN						
Clamp ends:	Acc to ISO or DIN						

Acc. to ISO or DIN

#### Pressure drop/capacity diagrams

Note! For the diagram the following applies: Medium: Water (68°F).

Measurement: In accordance with VDI 2173.

<sup>1</sup> This equipment is outside the scope of the directive 2014/34/EU and must not carry a separate CE marking according to the directive as the equipment has no own ignition source

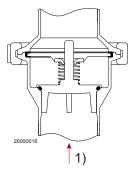

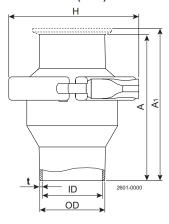

Figure 1. 1 = Flow direction.

Shows the optimal built-in situation to make sure the valve is drainable. The four guide legs of the valve cone ensure good alignment.  $90^{\circ}$ rotation.
