

# TAKE YOUR PROCESS RECORDING OFF THE CHARTS

PAPER RECORDING HAS GONE DIGITAL.  
MONITOR YOUR PROCESS WITH PMO COMPLIANT  
PPR AND LEGENDARY™ CLOUD SOFTWARE.

# GO OFF THE CHARTS AND:

## REMAIN PMO COMPLIANT WITH PPR AND LEGENDARY™

- Make a seamless transition—easily connect all existing sensors to the PPR unit
- Operators can review all trendlines, add annotations, and approve them directly on PPR's touch screen display
- Add annotations and approve records remotely from Legendary™ cloud software all while remaining PMO compliant

## AVOID UNPLANNED DOWNTIMES

- The digital PPR technology works without pen arms, motors, and other moving parts. Plant downtime due to mechanical failures and MRO events are a thing of the past.

## AVOID CONSUMABLES COST

- PPR eliminates recurring expenses for paper charts, pens, ink cartridges, pen arms, motors, and other mechanical parts

## REVIEW AND APPROVE RECORDS

- Streamlined workflows across the plant allow Quality Assurance to remotely view and approve records from all PPRs in a plant and have them audit-ready by State Inspectors.

## STORE AND RETRIEVE RECORDS

- Legendary™ securely saves all historical records and makes them available at your fingertips. No need to worry about charts getting wet, torn, damaged, or lost while handling or storing.

## ACCELERATE DIGITAL TRANSFORMATION

- Digital data monitoring and evaluation with PPR and Legendary™ enable process optimization at the plant

## PAPERLESS PROCESS RECORDER

The Paperless Process Recorder (PPR) is a digital recorder system for pasteurization, CIP, COP, raw silo monitoring, and any application that requires monitoring of process parameters like temperature, flow, pressure, level, conductivity, turbidity etc.

## LEGENDARY™ SOFTWARE

Legendary™ is a cloud-based management software that securely stores records from all PPRs in a plant. It allows authorized users remote access to review and approve records from any location all while meeting PMO and FDA regulations for milk pasteurization.
