

TOTE TILTER™

A cost-efficient
and safer way to
empty totes
with less
product waste

OVERVIEW

The TrueClean® ToteTilter™ provides a safe, easy, and cost-effective way to thoroughly evacuate product from totes with less waste. The hand valve (or optional foot valve) enables the operator to safely begin the automatic process of the ToteTilter™ which uses pressurized air to gradually raise the tote as its weight decreases.

FEATURES

- Reduces lost product
- Increases worker safety
- Incline increases automatically as container empties
- 304 stainless steel
- 2" square tube frame with fully welded ends
- Pre-drilled holes in stationary base to accommodate floor mounting
- Designed for easy forklift loading and unloading
- Available in 5° or 10° angles for better drainability

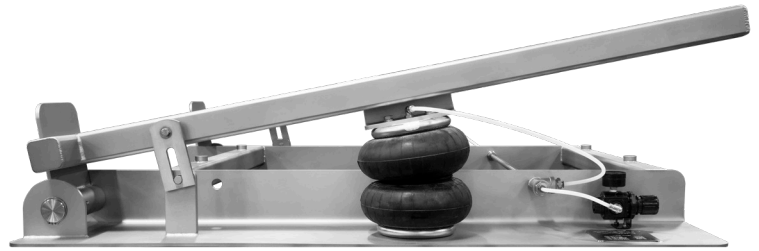

APPLICATIONS

- Processed Food and Beverage industries — fats, oils, pre-mix sweeteners, colorants, flavorings, and other additives or minor ingredients
- Chemical industries — resins, paints, and coatings
- High-Acid Food, Dairy, Brewery, Home & Personal Care, Pharmaceutical, Biotech, and Agrochemical industries
- IBCs and drums

MADE IN THE USA

SPECIFICATIONS

- Hand valve control
- Maximum load: 5000 lb
- Maximum lift: 1600 lb
- Maximum inlet pressure: 150 psig
- Maximum set pressure:
30 psig for 5° model
15 psig for 10° model

10° Model

OPTIONS

- 5° model TTT-05-304
- 10° model TTT-10-304
- Foot Valve Kit TTT-FV
